some poor "cuses."

In my last report Mr. George Mowery should have read Mrs. George Mowery. Mr. Mowery has been in poor health for some months but is very much improved. But the long continued strain of nursing her sick husband, together with the entire care of their four small children, has undermined the health of Mrs. Mowery and she is now in a critical condition with very little hopes of recovery.

Mr. Gruner was interred in the cemetery at Logan Sunday. Died of paralysis.

The company which drilled the oil well at Bremen we learn have received some flattering offers from other companies to buy them out but they refuse to sell as they have land leased and believe they have a good thing and propose to keep it awhile yet until they get the field more fully developed.

West Side

Well, people how does (or did) Friday's showers strike you all. We just thought we needed a little sprinkle of the seductive fluid, and of course not being backward in the cause, we all co-operated together and said "Rain" and behold it did. Mr. Rodney Burnett, Rockport, Mo., writes: "I suffered with enlarged prostate gland and kidney trouble for years and after taking two bottles of Foley's Kidney Cure I feel better than I have for twenty years, although I am now 91 years old." Thrashing is now the order of the day, the firm of P. Sator and sons, as usual, are doing the thrashing in this corner of the world. They have done the thrashing through here with a few exceptions for the last 30 years. One reason why the Sator firm take so well in this neighborhood is that they don't care whether you pay them or not.

Mr. Salem Kane passed through here Saturday from Laurelville with a load of coal.

Two unoccupied dwellings on the premises of Isaac Fox were burned to the ground on the night of August 10. The buildings were of little value but a quantity of hay is said to have been stored therein. So slowly fading, lingering, dying,
Like the leaf he passed away;
Heeding not our tears of anguish,
Heaven has claimed its own today and weep.

Why Do We Yawn?

There can be little doubt that one of the objects of yawning is the exercise of muscles which have been for a long time quiescent and the acceleration of the flow of blood and lymph, which have in consequence of this quiescence become sluggish; hence its frequency after one has remained for some time in the same position—for example, when waking in the morning. Co-operating with this cause is sleepiness and the shallow breathing which it entails. This factor, as well as muscle quiescence, is apt to attend the sense of boredom which one experiences in listening to a dull sermon; hence it is that the bored individual is apt to yawn. As in the case of sighing, the deep breath which accompanies the act of yawning compensates for the shallow breathing that is so apt to excite it.

Speaking of Rivers.

The Thames and the Seine are about as large as the nameless creeks that wander across almost every country in America, while the waters of the blue Danube could be poured into the boiling flood of the Mississippi without changing its colors a single shade.

What! You have never seen the Mississippi! Then, suggests Guy Walker in Good Housekeeping, postpone your trip abroad and see your own country first, for one of the most awe inspiring sights in nature, greater even than the roaring falls of Niagara, is to watch the silent, majestic and resistless sweep of the Mississippi at its flood.

Yearn of the Studio Girl.

"I know what I'm going to do," said the studio girl. "I am going to get me a real bed to sleep in. I think I'd be a lot happier if I slept in a real bed. I have been sleeping on couches so long I am sick and tired of these things you make up to look like anything but a bed in the daytime."

"The other night I went to stay all night with a married friend of mine and slept in her spare room in a real bed, and I tell you I felt like a real lady."—Cleveland Plain Dealer.
